Objective

As a front-end developer with two years of experience, I am committed to expanding my skill set and knowledge in this dynamic field. I strive to blend creativity with technical proficiency to deliver visually appealing and functional websites. Seeking opportunities to leverage my skills and expertise in front-end development to contribute to dynamic projects and help businesses enhance their online presence

Experience

Zedni   **2025-ongoing**

- Built a portifolio for the company using WordPress
- Build a cleaning services website

Sputix   **2024-2025**

- Build and developed e-commerce
- Create a multi-languages website

Projects

E-commerce

Developed a modern e-commerce platform with robust features, including product and category management, multi-user roles with permission control, and dynamic ad placement. Implemented multi-theme support using Styled Components and integrated multilingual functionality with i18next. Built secure authentication systems for both customers and admin users.

Food Community

Built a modern food community platform using Next.js, allowing users to share, explore, and discover diverse dishes and recipes. Designed a sleek, responsive UI for seamless browsing and interaction across all devices. Implemented key features such as recipe uploads, user engagement through likes and comments, and optimized performance with Next.js server-side rendering, creating an engaging and dynamic experience for food enthusiasts.

Dashonic

Developed a fully responsive and dynamic dashboard application using React.js and Styled-Components for modern UI design. Integrated Chart.js for interactive data visualizations and React-Data-Table-Component for efficient data management. executed multilingual support with i18next, enhancing user accessibility across different languages.

Personal portfolio

Built a modern and responsive personal portfolio website using React.js and TypeScript for robust, type-safe development. Styled with Tailwind CSS for a sleek and consistent design, and integrated Framer Motion to deliver smooth animations and interactive user experiences.
